

Building a wealth of expertise

Training

Critical to the success of any prepayment project is the transfer of skills and knowledge. To this end, Conlog is the only prepayment company in the world to offer a dedicated training centre, specialising in providing accredited training courses in all aspects of prepayment.

Key benefits

- > Accredited training facility
- > Customisable training prospectus
- > Training on all aspects of prepayment
- > Mix of practical and lecture

We see a world where we can all achieve more while using less

We help utilities maximise their service delivery

Our products, solutions and services are simple, efficient and innovative

Helping you each step of the way

Conlog's training courses consist of a number of modules and utilise Outcomes Based Education and Training, so that delegates are able to proceed at their own pace. The training also comprises both lecture and practical aspects, to ensure complete understanding of the topics.

A key benefit of our training is that we have defined several job functions within prepaid electricity, which would be performed by the utility's personnel. This enables you to select the most appropriate course based on the job function, level and experience.

Our training courses range from training directors, accountants and auditors, to meter installers, management system operators and vending unit operators.

At the end of all training an assessment and/or examination is taken, to ensure competency and certification.

All training is offered on site at your premises, or at Conlog's fully equipped training centre in Durban, South Africa.

Summary of training offered

The following provides a very brief summary of some Conlog training courses. Should customers have specific topics, or areas of training required, Conlog can develop specialised courses to meet these needs.

- > Management system administrators
- > Management system operators
- > Vending unit operator
- > Meter installers and inspectors
- > Prepayment system support
- > Workshop technicians
- > Introduction to prepaid revenue management
